

Michell approximate 28-point scaffold

Approximate septenary framework compared with source-supported exact incidence

● 12 Moon-centre points ■ 8 inter-Moon gaps ◆ 8 intersection positioners — scaffold → NJG_INC

Septenary approximation

Michell step α
51.470701432440°

Exact $360^\circ/7$ step
51.428571428571°

Difference
+0.042130003869°
Relative error: 0.081919452%

Moon-centre comparison

Scaffold β
25.587895702680°

NJG_INC β
25.911931045856°

Angular difference
-0.324035343176°

Maximum centre displacement
0.039588332660 u

Incidence residual
0.039354450727 u

Figure 28 arithmetic

$36 + 6.666667 + 1.333333 = 44$

12 Moon diameters + 4 large gaps
+ 8 small gaps

Oblique displacement inset

One centre shift magnified 40×

blue = scaffold; black = NJG_INC

Angular scaffold: approximate.
Circumference arithmetic: exact under $\pi = 22/7$.
