

Micell Figure 14 heptagram comparison

Computational reconstruction — not a facsimile of the printed plate

A

Exact regular {7/2}

Maximum point residual
0.043764497580 u

RMS point residual
0.027485963021 u

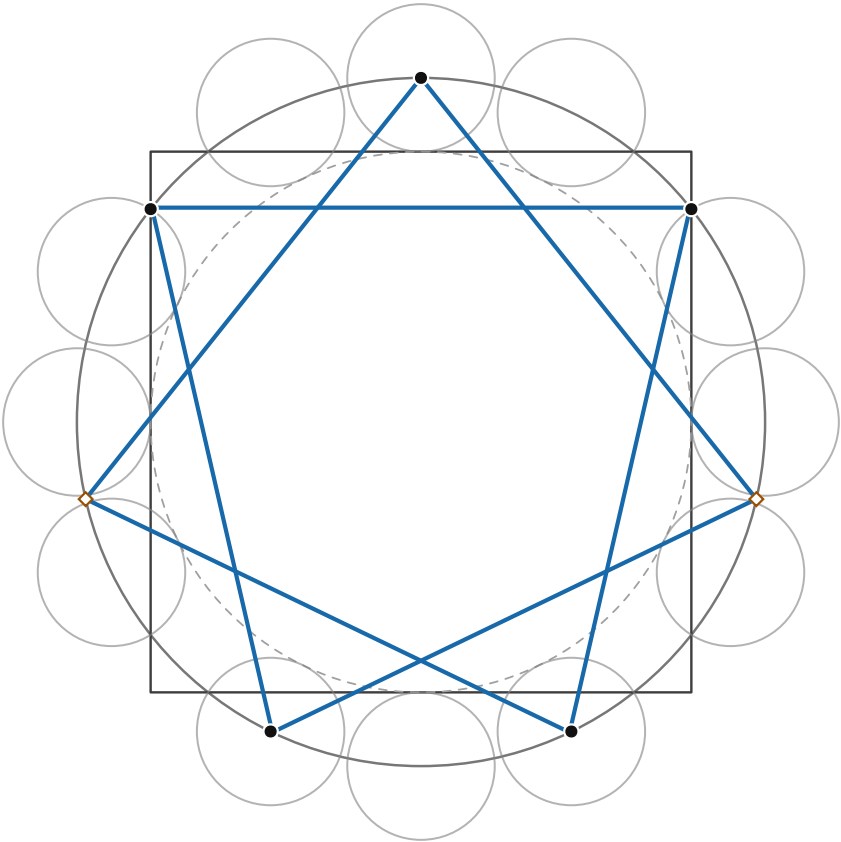

Maximum angular residual
0.358217870°

Edge-length coefficient of variation
0.000000000000

REGULAR_7_2

B

Micell 28-point {7/2}

Maximum point residual
0.039588332660 u

RMS point residual
0.029576548097 u

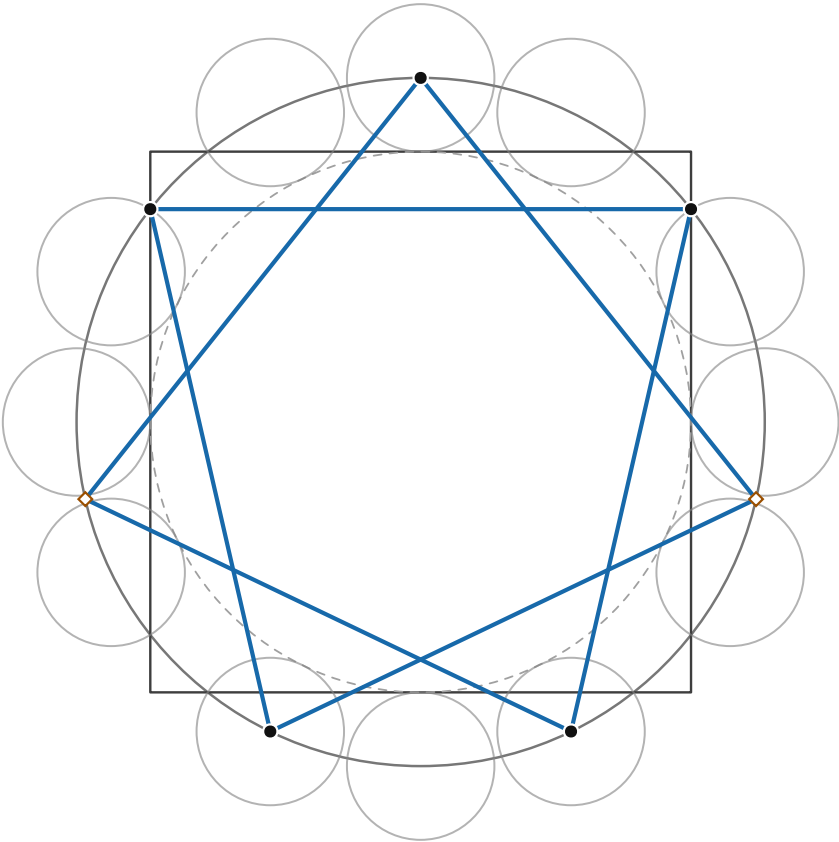

Maximum angular residual
0.324035343°

Edge-length coefficient of variation
0.000927802213

MICELL_28_7_2

C

Figure-14-aligned {7/2}

Maximum point residual
0.000000000000 u

RMS point residual
0.000000000000 u

Maximum angular residual
0.000000000°

Edge-length coefficient of variation
0.002845183909

FIGURE14_ALIGNED_7_2

—●— candidate {7/2} ● text-and-plate anchor ◇ plate-inferred gap anchor — candidate-to-anchor residual

Five endpoint identities are source-supported; two inter-Moon-gap endpoints remain project inferences.
